## The Language of The Database World

- **SQL** stands for Structured Query Language
- Used to run a query (ask a question) against the data in a database
- Usually, you will write a query in a plain English-like format and get a result set in table-like format

## Maintaining Relationships Between Tables

- Tables link with each other with common keys (stored in fields)
- **Common Relationships:** One to Many, Many to One
- **Rare Relationships:** One to One, Many to Many
